PROFESSIONAL SUMMARY

Recent Computer Science graduate with experience in software development, data analytics, and technical support gained through academic projects and internship experience. Proficient in Java, Python, JavaScript, SQL, and modern web technologies, with strong problem-solving, teamwork, and communication skills. Passionate about developing innovative software solutions and continuously expanding technical expertise.

EDUCATION

Saint Louis University

Bachelor of Science in Computer Science, Cum Laude

Relevant Coursework: Web Development, Artificial Intelligence, Data Science, Data Mining

SCHEMA Sports News Writer

Baguio City

May 2026

2024-2026

INTERNSHIP

Department of Information and Communications Technology (DICT-CAR)

June 2025 - July 2025

- Developed and tested components of a ticketing system for the DICT GovNet Program, helping streamline issue tracking, support request management, and technical support workflows.
- Assisted in the deployment, maintenance, and troubleshooting of network infrastructure under the Free Wi-Fi for All Program and GovNet initiatives, supporting reliable network operations and connectivity services for beneficiary sites.

PROJECTS

AI Emotional Support Chatbot (Thesis)

Technologies: Next.js, Laravel, FastAPI, Python, MySQL

- Developed an AI-powered emotional support chatbot for university students using Next.js, Laravel, FastAPI, and MySQL, integrating a LoRA fine-tuned LLaMA 3.1 model with crisis-risk detection and emergency hotline recommendations for safe and empathetic user support.

Strawberry Disease Identification System

Technologies: Python, TensorFlow/Keras, MobileNetV2, HTML, CSS, JavaScript

- Co-developed a deep learning-based strawberry disease detection system using MobileNetV2 and a dataset of 7,398 annotated images, achieving 99% classification accuracy across seven disease categories and evaluating performance using standard machine learning metrics.

E-Commerce Delivery Performance Analytics Dashboard

Technologies: Python, Power BI

- Developed an E-Commerce Delivery Performance Analytics Dashboard using Python and Power BI, cleaning, transforming, and modeling over 100,000 e-commerce records using a star schema data model. Designed interactive dashboards to analyze delivery performance, freight costs, customer satisfaction, and regional trends, enabling data-driven insights and operational decision-making.

ACHIEVEMENTS

- Published "*A Deep Learning-Based System for Strawberry Plant Disease Identification*" as a co-author in the *Journal of Global Business Online Journal* (Volume 14, Issue 3, ISSN 2350-7179), November 2025.
- Co-authored "*Comparative Analysis of Traditional Machine Learning and Deep Learning Models for Strawberry Disease*", awarded **Best Research Paper in Engineering, Computing, and Technology** during the 1st International Conference on Sustainable Development in Education, Technology, Agriculture, and Gender and Development, held at Isabela State University, March 2026.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, PHP, SQL, C++

Web: React, Next.js, Laravel, Node.js, HTML, CSS

Tools: Visual Studio Code, Google Colab, Excel, Git, GitHub, Claude AI (AI-assisted development)
